

Webmail client

Webmail Client

You can access our Basic Webmail client (Atmail) by going to:

<https://webmail.emailarray.com>

We're currently beta testing AfterLogic WebMail Pro, which might become our new default WebMail for basic accounts.

You can test it at <https://al.emailarray.com> and please give us your feedback. A video tutorial is available [here](#).

Alternatively, we also offers several light-weight open-source webmail clients:

Atmail v5: <http://atmail.emailarray.com>

Roundcube: <https://roundcube.emailarray.com>

Squirrelmail: <https://sqmail.emailarray.com>

Horde/IMP: <https://horde.emailarray.com>

You can choose your preferred **Default WebMail** in **Domains > Edit** section of the Admin Panel, assuming that you have [pointed the webmail CNAME properly](#).
