

# User Trusted Login IPs

You can mark as safe the IPs that your Users log in from. Use the Mark as Safe feature whenever a Security Incident is considered as safe - logins from the safe IP will not trigger Security Incident warning anymore.

## Manage User Trusted Login IPs

To manage the User trusted login IPs for an account:

- Log in to the [Admin Panel](#)
- From the menu, go to **Security User Trusted Login IPs**
- Select the domain from the dropdown and click on the **Search** button.
- A list of all trusted IPs that were previously Marked as Safe will show.

Security -> User Trusted Login IPs

User Trusted Login IPs

Select Domain

mydomain.com

Search

Username	Domain	Description	IP	Range	Action
alice	mydomain.com	Work	211.213.120.118	/32	
alice	mydomain.com	Email-client	52.97.174.93	/24	

Rows per page: 10 1-2 of 2 |< < > >|

- You can delete an entry at anytime
- To add a new trusted IP, [follow these steps](#).
